

## WALK FOR WATER

### SUPPLIES:

Container[s] to Carry Water [an empty milk or juice jug works great]

Water Source

### INSTRUCTIONS:

1. Identify the closest natural water source to your location. This may be a lake, river, stream, or drainage ditch near your home.
2. Walk to your chosen water source with your water containers, find a safe location to reach the water, and fill your containers with water.
3. Carry your water home. Set it next to your sink and think about drinking it every day [but please, do NOT drink this water].
