Walk out onto a dock. What can you see?

Spot a rabbit. Were they hard or easy to see? Why?

Feel tree bark. Was it smooth or bumpy?

Find a pine cone. How big is it compare to a baseball?

Smell a flower. What color are the petals?

Smell the grass. What does it remind you of?

Find a good walking stick, but leave it on the trail before you leave.

Guess the number of branches on a tree, then count. Were you close?

Watch ants marching on the trail. How many could you count?

Stop to read a trail sign. What did it tell you?

Silently watch a duck swim in the water. What color was the duck?

(Safely) touch river water. How does it feel?

FREE

Find a cool rock. What made you pick this one?

Look at the water inside a puddle. Is anything moving?

Walk across a wooden bridge. Were you far from the water?

Find a partially eaten walnut. Who do you think ate it?

Listen for a chickadee. Did they sing loud or soft?

Spot a colorful bird. What color was it?

Find the blue/purple raspberry stems arching along the trail

Find a squirrel climbing a tree. Were they moving fast or slow?

Make your body look like a squiggly vine. Was that easy or hard?

Look for a leaf the size of your hand. Was this easy to find?

Find a patch of moss and imagine taking a nap on its soft surface.

Listen to the sound of the wind in the forest.

Ways to care for the Earth while in nature:

- Keep a plastic bag in your vehicle to pick up trash
- Only walk on established trails and durable surfaces
- Start a nature journal that allows you to draw and write about the cool rocks, sticks, etc. that you find instead of taking them home
